

RUBBER IMPACT BARS

Prevent damage to your conveyor belt and keep the product where it should be-on the belt. Sioux Rubber and Urethane has manufactured molded impact bars for the mining and quarry business for more than 25 years. Our impact bars are made of premium impact resistant Endurawear® Rubber, a 3/8" UHMW top and metal insert all permanently bonded through our special molding and vulcanization process.

Endurawear® Rubber provides excellent cushioning and impact absorption. Easily installed, impact bars are a cost effective method for conveyor supports, impact beds and feed chute collectors.

SR replacement impact bars

Standard Impact Bar Specifications:

- Bar dimensions - 3" height, 4" width, up to 72" long
- 3/8" super slick UHMW top
- Coefficient of friction: 0.5
