

RUBBER LINERS

Sioux Rubber & Urethane can line an existing piece of equipment such as a pump housing, cyclone or impeller. We can also make a bolt-on or slip-in liner for your specific application. Rubber liners for tanks, fan housings, pump housings, scrubbers, reactors, impellers, ducts and other equipment extends the service life saving you money. Sioux Rubber & Urethane also lines chutes, pipes, flexible bends, cement mixers, tumbling barrels, fittings and flanges. Not only do rubber liners protect metal, but they also protect the product or contents from contamination or damage.

FABRICATED ITEMS

- Rubber lining can be applied to new or existing equipment
- Many rubber compounds are available

Rubber lining is considerably cheaper than equipment replacement and the associated downtime for repairs or replacement. We can help specify the appropriate type of rubber to provide the maximum protection possible in your particular situation.

30" Dia. x 24" Deep Tumbler

36" Dia. Pump Housing

Bolt-In Liner For Mixer

3' x 20' Sand Flume
